

How to find who visited instagram profile

Continue

In the future, Instagram will not provide you with information about who viewed your Instagram profile. Of course, you get access to a list of people who have seen your stories and liked your posts or videos. However, people who may have visited your profile will not be shown. However, there are several third-party apps available for download for both Android and iPhone that can provide access to this information. Here's a list of apps you can download to your smartphone starting April 2022 that will help you find out who's viewed your Instagram profile. I think the obvious reason why the company didn't include this feature is user privacy. Since the majority of Instagram users spend their time visiting other users' profiles, publishing their activities can be seen as a violation of users' privacy, resulting in fewer users on the platform. Now, there is no guarantee that the apps below will be able to reveal the (full) identity of the users of your Instagram profile. However, since they are still available for download, you can give them a try. It analyzes your Instagram profile and alerts you to people who have followed or viewed your profile. Not only that, it also claims to reveal the identity of people who may have viewed your photos on your Instagram profile. Download from here. Also Read: 3 Best Ways To Know If Someone Follows You On Instagram It allows you to track your followers in detail, such as discovering new followers, those who have recently unfollowed you, your top likes and comments, those who have never liked or commented on your posts, and more. It also allows you to analyze other public accounts. Download from here. Analyzer PlusAt this time, Instagram does not provide you with any information about who viewed your Instagram profile. Of course, you will get access to the list of people who have seen your stories and liked your posts or videos. But the people who may have visited your profile remain hidden from your eyes. However, there are several third-party apps that can be downloaded on both Android and iPhone that can provide access to this information. Here is a list of apps available to download on your smartphone starting April 2022 that will help you find out who viewed your Instagram profile. The obvious reason why the company does not allow this feature is considered to be user privacy. Since most Instagram users spend their time visiting other users' profiles, publishing their activities can be seen as an invasion of users' privacy, resulting in lower traffic to the platform. Now, there is no guarantee that the applications below will be able to (fully) reveal the identity of the visitors to your Instagram profile. However, since they are still available for download, you can try them out. InMyStalker First, the InMyStalker app is available for download on Android devices.
